concrete sensors BY HILTI

T2 2-IN-1 CONCRETE SENSOR

New Benefits

- Two embedded temperature probes at both ends of the sensor
- Use half the number of sensors for your project
- Drastically reduce the upfront cost
- Easier installation

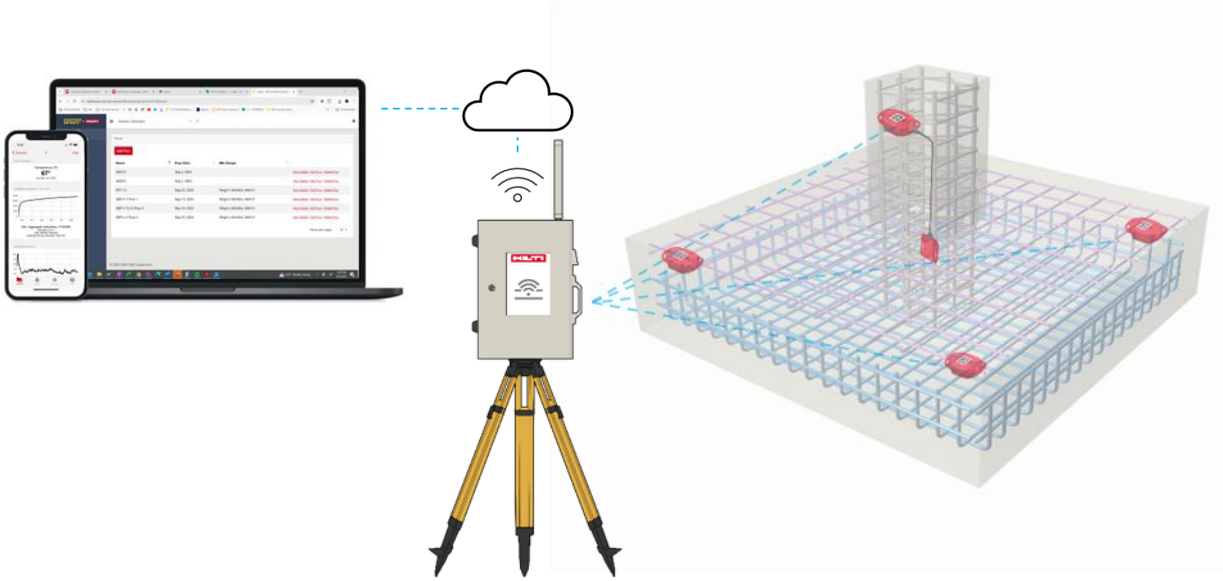

Temperature Probe 1

Temperature Probe 2

Core Features

- Monitoring depths up to 15ft (5m)
- Works with long range onsite Gateway to collect and sync concrete data
- 24/7 monitoring with real time temperature and strength alerts
- 6-month battery life once sensor is activated

Project Collaboration | Wireless Technology | Simple Setup | Easy Reporting | Alerts

concrete sensors BY HILTI

T1 2-IN-1 CONCRETE SENSOR

New Benefits

- Two embedded temperature probes at both ends of the sensor
- Use half the number of sensors for your project
- Drastically reduce the upfront cost
- Easier installation

Temperature Probe 1

Temperature Probe 2

Core Features

- Monitoring depths up to 15ft (5m)
- Works with short range wireless Bluetooth to collect and sync concrete data
- Onsite data collection for temperature and strength alerts
- 6-month battery life once sensor is activated
